

ECO 'LUNCH & LEARN' FALL SERIES

Presented by
**Bermuda College
& Bermuda Environmental Sustainability Taskforce (BEST)**

> *BEST and the Bermuda College are committed to providing a forum for learning; with knowledge comes empowerment. In each of the presentations we invite the community to learn more about global and local issues while discussing individual and collective solution-based actions that can be taken.*

> *The second series promises to be filled with important and interesting information that will inspire and encourage ongoing discussion on Bermuda's environmental issues. Lectures are scheduled for the last Thursday of each month: **September, October & November 2019** and recommences in **February, March & April 2020.***

www.best.org.bm

Bring your own lunch and learn about Bermuda's most pressing environmental issues, followed by a lively Q&A on possible solutions. This lecture is **FREE** and no registration is required. This third presentation

in the series is on

Thursday, November 28, 2019

and presented by

Dr. Dörte Horsfield

'Island Biodiversity & the Movement of Species'

Species are on the move worldwide and Bermuda's biodiversity has been under great pressure from invasive species, habitat change, development and over-exploitation. Learn what actions we can take to ensure the survival of Bermuda's fragile endemic species.

**Bermuda College, Room H100 in Hallett Hall
1:00pm to 2:00pm**
