

# ECO 'LUNCH & LEARN' SERIES CONTINUES!

Presented by  
Bermuda College  
& Bermuda Environmental Sustainability Taskforce (BEST)

> BEST and the Bermuda College are committed to providing a forum for learning. With knowledge comes empowerment. Each month we invite the community to learn more about global and local environmental issues while discussing individual and collective, solution-based actions that can be taken.

> Past guest speakers include Nick Hutchings presenting "Energy Conservation: A Matter of National Security"; Weldon Wade, of "Guardians of the Reef" and Sue Khan of "Naked Zero" presenting on turning their passion for the environment into action and Amis Wharton, M.Sc, on 'The State of Bermuda's Food Security'.

To read more about their presentations, please visit our website: [www.best.org.bm](http://www.best.org.bm)

Bring your own lunch & learn about Bermuda's most pressing environmental issues, followed by a lively Q & A on possible solutions.

The series continues on the last Thursday in February, March & April 2019.

This series is free! No registration required.

Don't miss our

**FOURTH LECTURE IN THE SERIES:  
Thursday, FEBRUARY 28, 2019**

**Dr. Robbie Smith presents**

**'The Impact of Plastic Marine Debris on Bermuda's Marine Environment'**

How much debris is stranding on our island? Learn about research on microplastics in the Sargasso Sea, our inshore waters and its impacts on our marine life.

Bermuda College, Room H100  
1:00pm to 2:00pm

BEST relies entirely on support from our community. Please consider a donation to assist our work.
